8438425770 | peeralameen18@gmail.com

SUMMARY

PHP/Laravel Developer specializing in backend application development, REST API development and integration, MySQL database design and optimization, and third-party system integrations. Strong hands-on experience with Laravel MVC, Eloquent ORM, authentication, authorization, middleware, validation, queues/jobs, events/listeners, caching, notifications, scheduled tasks, and Service/Repository architecture. Experienced in developing business applications, integrating external APIs and enterprise systems, troubleshooting production issues, and working with payment, kiosk, biometric, billing, and printing-related systems. Also experienced in frontend development using JavaScript, jQuery, AJAX, Bootstrap, Blade, and Livewire.

PROFESSIONAL EXPERIENCE

IPROAT Solutions

Location: Chennai, Tamil Nadu, India
Role: PHP/Laravel Developer
Duration: Jan 2024 – Present

SUZHIYAM Software Company

Location: Nagercoil, Tamil Nadu, India
Role: PHP/Laravel Developer
Duration: Jul 2022 – Dec 2023

SELECTED PROJECTS

United Finance Corporation – EMI Payment & Kiosk Management

- Developed and maintained an EMI payment management application integrated with kiosk machines.
- Implemented payment-related workflows for customer EMI information and kiosk-based transactions.
- Developed and integrated APIs for transaction processing and payment status handling.
- Worked on application and kiosk data synchronization and troubleshooting of integration issues.

Shell Oman – Visitor Management System

- Developed and maintained a visitor management system for visitor registration and record management.
- Implemented visitor entry and exit tracking workflows.
- Developed application functionality for managing visitor information and organizational requirements.
- Provided bug fixing, troubleshooting, and ongoing application enhancements.

Pro-People – Human Resource Management

- Developed and maintained an employee management system covering employee information and attendance-related operations.
- Integrated biometric machines for employee attendance tracking and data synchronization.
- Developed attendance processing workflows and supported payroll-related business requirements.
- Worked on ERP integration involving SAP and Oracle for data exchange between enterprise systems and the application.
- Handled troubleshooting, data processing, application enhancements, and integration-related issues.

Pro-School – School Management System

- Developed and maintained a school management system supporting day-to-day administrative operations.
- Implemented student and employee management workflows.
- Integrated biometric machines for attendance management and data synchronization.
- Developed application functionality based on school management requirements.

Canteen Management System

- Developed and maintained a canteen management and billing application integrated with billing machines.
- Implemented billing and transaction-related workflows for daily canteen operations.
- Integrated the application with billing machines and printing machines.
- Implemented data synchronization between the application and integrated hardware devices.
- Handled troubleshooting and integration issues related to daily operations.

TECHNICAL SKILLS

Backend: PHP, Laravel, MVC, Eloquent ORM, Service/Repository Pattern, Middleware, Authentication, Authorization, Validation, Queues/Jobs, Events/Listeners, Scheduled Tasks/Cron, Cache, Notifications, Mail, Storage

API & Integration: REST API Development, REST API Integration, Laravel HTTP Client, Guzzle, JSON, API Authentication, OAuth, JWT, Request/Response Handling, External API Integration, Third-Party System Integration

Database: MySQL, Database Design, Joins, Subqueries, Relationships, Transactions, Constraints, Indexing, Query Optimization, Stored Procedures

Frontend: HTML5, CSS3, JavaScript, jQuery, AJAX, Bootstrap, Blade, Livewire

Tools: Git, GitLab, Composer, NPM, Postman

Server: Linux, Apache, cPanel, Environment Configuration, Permissions, Cron Jobs

Systems & Integrations: Payment Systems, Kiosk Machines, Biometric Machines, Billing Machines, Printing Machines, SAP Integration, Oracle Integration

EDUCATION

B.E. – Electronics & Communication Engineering (ECE) — 2019

CERTIFICATION

Selenium + Java Automation Testing Certification
